YEAR 6

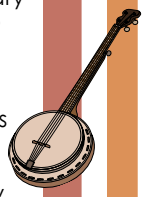

TERM 4 CURRICULUM OVERVIEW

ENGLISH

In this unit, students will step into the world of Australian poetry, exploring the iconic works of Banjo Paterson alongside the powerful voices of contemporary slam poets. Inspired by The Man from Snowy River, students will investigate how rhythm, imagery, figurative language and literary devices bring characters, settings and stories to life while engaging and influencing audiences.

Through reading, viewing, listening and performing, students will explore the differences between traditional ballads and modern slam poetry before choosing their own poetic path. They will experiment with expressive vocabulary, sentence structures and poetic techniques to craft, refine and rehearse an original ballad or slam poem.

MATHEMATICS

In this unit, students will become Data Investigators and Budget Strategists, uncovering the truth behind video game advertisements, spending patterns and claims of popularity. Through real-world investigations, students will explore fractions, decimals and percentages to solve financial problems, estimate costs and make informed spending decisions. They will collect, compare and analyse data using digital tools, investigating how statistics can be used to influence audiences and sometimes mislead consumers. Students will also conduct chance experiments and digital simulations to explore the role of luck and probability in gaming.

Through mathematical modelling, critical thinking and problem-solving, students will learn to question the numbers.

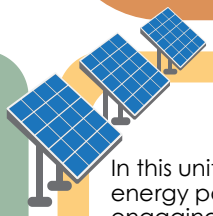

HASS

In this unit, students will become mini-entrepreneurs, exploring the exciting world of business and economics through project-based learning. Students will investigate resource allocation, consumer choices and market trends, while exploring business responsibilities, ethical decision-making and different perspectives.

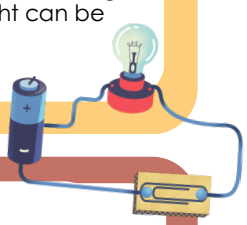

Through hands-on experiences, students will collaborate to plan, create and manage their own businesses, applying financial reasoning, creativity and problem-solving skills. Students will bring their entrepreneurial ideas to life by selling products to the local community.

SCIENCE

In this unit, students will be exploring how electrical energy powers our everyday lives. Through engaging, hands-on investigations, students will discover how simple circuits work, exploring components such as batteries, bulbs and switches, and how electrical energy is transformed into light, heat, sound and movement. They will investigate different sources of electrical energy, including solar power, and explore how sunlight can be converted into electricity.

MEDIA ARTS

Students will be using media art language and technologies to experiment with different filming styles, representing television genres including Talk Shows, Game Shows, Music Videos, Drama and Comedy.

MUSIC

Students will explore how modern Indigenous artists express cultural identity, storytelling and connection through music. They will investigate key artists, songs and instruments such as voice, guitar and didgeridoo, while developing the understanding of musical elements. Through listening, analysis and hands-on music-making, students will deepen their appreciation of Indigenous voices in contemporary music.

HPE

In this unit, students will develop their volleyball skills, applying movement strategies, teamwork and fair play during mini-volleyball games. They will learn to create space, maintain rallies and work collaboratively to achieve success on the court. In Health, students will explore the emotions, challenges and opportunities associated with growing older and transitioning to secondary school. Through reflection and discussion, they will develop practical strategies to build confidence, resilience and positive relationships.
